Dear Clive,

Further to our discussions in June, I have looked at a range of air purification products that may assist in the control of your asthma. Information regarding these appliances is enclosed.

Whilst the use of air purification systems does not address the air quality issues in the Tamar Valley they may help to alleviate your specific symptoms and improve your overall health outcomes.

I was interested to read your apparent support for the Forest Industries' research into wood fuelled power generation and hope that with the completion of plantation establishment in your area the smoke issue relating to forestry operations will be significantly reduced.

I apologise for the delay in getting back to you and I hope that the enclosed information will be of some use to you.

Regards

Jane Becker (CLO Mersey.)
