

7th.October 2009

Jodie Campbell MP
Federal Member for Bass
PO Box 5035
Launceston
Tasmania. 7250

Dear Minister,

Air Quality - Smoke inhalation from planned burns

I was in discussion with Mr. Geoff Lyons of your office yesterday. It was to find out what had been done in relation to correspondence I forwarded to your office on this subject on the 23rd July 2009.

Obviously it appears nothing had been done as my correspondence was not on file, although it was sent to this post box and again later it was faxed and confirmed as being received by way of telephone call to your Ms Jodie Jacobs.

As poor as this is, Mr. Lyons has started things moving it would seem, but I must point out he is, I believe, completely on the wrong track for the following reason. Ms Sharni Driessen, adviser to the Premier Mr David Bartlett, has confirmed to me that Air Quality comes under Minister Michelle O'Byrne in Tasmania, not David Llewellyn as Mr Lyons claims.

Mr. Lyons then informed me he does not work for you any more.

After many months Minister I ask you again, what have you done for the Bass electorate in regards to pernicious planned burn smoke at a federal and state level?

For your convenience I am enclosing the advice from the Premiers adviser....

Re: Air Quality

Dear Mr Stott,

I am sorry to confuse I was using general terminology, but yes you are correct, Minister O'Byrne does cover the portfolio heading of Air Quality. I encourage you to contact

Minister Michelle O'Byrne's office in regards to your meeting request. I have contacted Minister Michelle O'Byrne's office and raised your concerns, I have again informed them of your current correspondence with me.

Kind Regards,

Sharni Driessen

Adviser to the Premier

Office of the Hon David Bartlett MP

Premier of Tasmania

Thank you.

Yours faithfully,

Clive M. Stott
