

PULP MILL

Examiner 22.9.2016

Mick Leopard's letter linking the Tamar Valley pulp mill and voluntary euthanasia made me laugh (*The Examiner*, November 18). He fails to accept the pulp mill proposal is dead. Euthanised and buried by a sound majority of the community this mill was critically non-compliant and never had a social licence. Imagine what will happen if anyone tries to dig the rotten, stinking thing up? GetUp's campaign showed health was the biggest ticket item at the last election in Bass, Look what happened in Braddon and Lyons as well. Please put your effort into improving the health of those living in the north; not suggesting we make it worse with a pulp mill.

Clive Stott, Grindelwald.
