

Smoke Watch 10.4.2013

Posted Wed Apr 17, 2013 10:02 pm

Smoke was about on the 10th April.....see EXIF.

This shot was taken about 9.22am going north down Waldhorn Drive to the WT highway corner.

The smoke was coming from on a property on the eastern side of the highway about 1Km or so from this corner towards Exeter.

The source appeared to be further down the property, not the piles of green stacked up from the road widening.

EPA incident logged
