

Smoke Watch 13.4.2012

Tue Apr 17, 2012 2:43 am

Blocking out the last light and blocking out the air.

This shot was taken at 18.42 hrs looking south/westish from my home.

The wide angle lens was not wide enough to capture the full size of the smoke.

A plane was coming in to land at Launceston and it was above the smoke, probably didn't want a flame-out.

The smoke appeared to be losing height. I could smell it, it stunk, and it made me breathless.

I was forced to take prescription medication to help me breathe.
