

Smoke Watch 14.4.2012

Tue Apr 17, 2012 2:58 am

Still suffering breathing difficulties from yesterdays and earlier smoke events, this shot was taken at about 19.00 hrs. looking S./Westerly.

I zoomed in to show how thick it was and to get it's true colour, however, the smoke extended as far as the eye could see to the left and right.

The smoke was settling out of suspension for the night. It was on the nose!

There was now smoke smell inside the home.

More distress; more medication.
