

Smoke Watch 15.4.2013

Posted Wed Apr 17, 2013 9:55 pm

A strong smoke smell started coming into Grindelwald area this afternoon – 15/4/2013.

I decided to go looking for the source at about 5.50PM.

As I turned right into Waldhorn Drive I could see smoke ahead of me and I took two photos of it (attached).

I continued on to Brady's Lookout but it was as clear as a bell down there. Exeter was in the shadow but you can clearly see street lights in the far distance.

When I got back home a short time later I could smell the smoke inside the closed-up house.

I could not locate the burn/s and the smoke smell is still inside the house at this time.

Complaint emailed to incidentresponse@environment.tas.gov.au
