

23.6.2015 - Riverside Golf Club smoke

Posted Wed Jun 24, 2015 5:51 pm

Golf. Not it is all cracked up to be!

This green waste had been freshly cut in the last day or so and today they were burning it. At least one property close to the golf course had smoke in their unit that evening. The golf club shows no consideration to adjoining neighbours and members need to speak up. Why wasn't this waste loaded onto a truck and taken to the green waste station, or better still a chipper/mulcher brought in to mulch it on site?

There are alternatives to smoking people out with their toxic residue

[http://cleanairtas.com/departments/alte ... utions.htm](http://cleanairtas.com/departments/alte...utions.htm)

This is the 7th stinking burn that has been carried out since March and they have been doing it for years.

Accelerants must have been used to get the burns started as our weather has been cold and wet.

Our air sheds are not a sewer.
