

16.5.2010 Smoke watch

Tue May 18, 2010 8:13 pm

Blue smoke was widespread today and breathing was made difficult because of its stink.

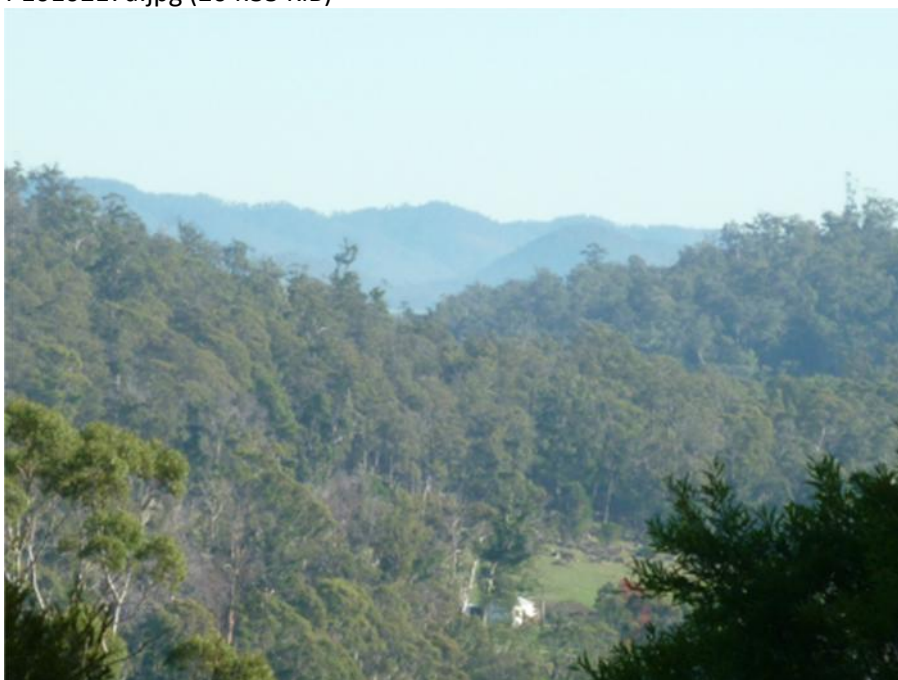

It was evident in greater quantities out to the west and to the north from where I took these photos, but it also appeared to the E/S/and S/E.

I would imagine by the look of it Exeter monitoring station missed the bulk of it as the township looked to be missing the path of it.

The pictures were taken at 11.15am

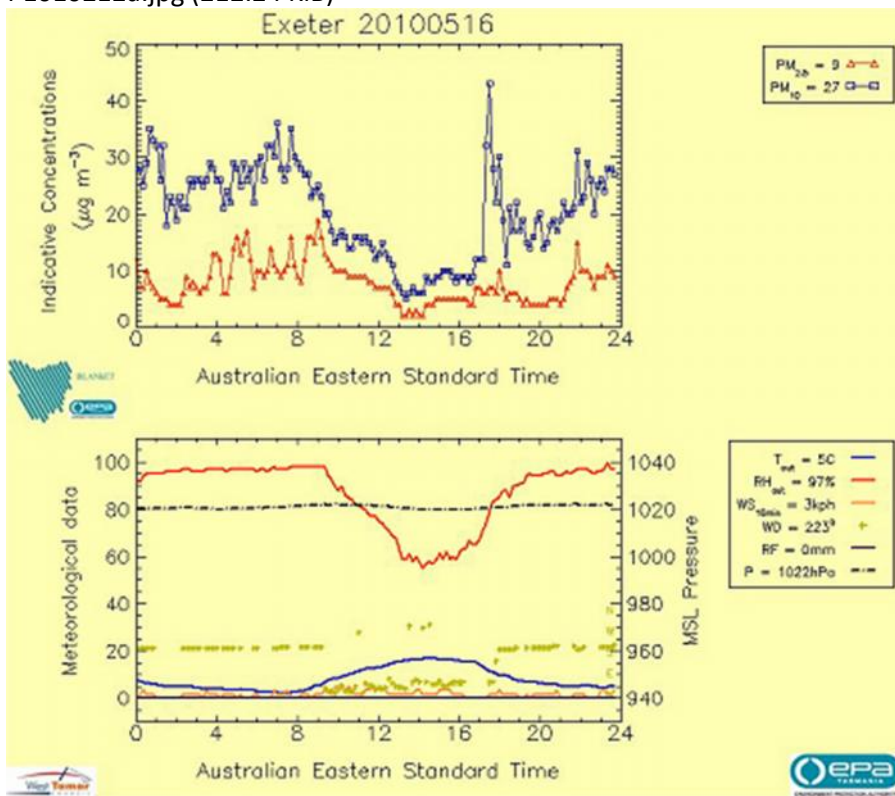

Blue smoke could be seen all to the East, South, and S/E
P1010217a.jpg (204.35 KiB)

Smoke was thick out to the west as well
P1010221a.jpg (204.44 KiB)

heavy smoke shows right across the north of Exeter
 P1010212a.jpg (212.24 KiB)

EPA's indicative air quality monitoring for Exeter today. This monitoring site just missed heavier smoke.
