Why hasn't the fire permit season been introduced if there are so many 'bushfires' (see below).

If plantations are going to be planted after the "bushfires", then this is forestry industry smoke?

The Tamar Valley was full of smoke driving people indoors and onto medication to help them breathe. A complaint was made to the Environment Division a/h number.

The screenshot shows a Windows Internet Explorer browser window displaying the Tasmania Fire Service bushfire map. The browser's address bar shows the URL: <http://www.fire.tas.gov.au/mysite/Show?pageId=colGMapBushfires>. The page header features the Tasmania Fire Service logo and a banner with two firefighters. The main content is a map of Tasmania with various bushfire locations marked by colored triangles (red, green, black). A list of bushfire summaries is displayed on the right side of the page, including:
