

Smoke Watch 6.7.2012

Posted Sun Jul 15, 2012 8:09 pm

Plenty of smoke in the Tamar Valley today.

This photo was taken at 3.18pm from Brady's Lookout towards Exeter. Smoke plumes were visibly dotted around everywhere from outdoor/backyard burning. The smoke had fused from all these burns.

On the way into Exeter (maybe 2 -3 Km) I went past six backyard burns.

Wood heaters were not the general problem; just the odd flue still smoking. These smoke all the time!
